

■■ PhishGuard — Enterprise Platform Progress Report

Next-Generation AI Cyber Awareness & Phishing Simulation Infrastructure

Repository: github.com/Aryan130805/AI-PhishGuard	Live URL: phishguard-ochre.vercel.app
Supabase Project ID: <code>ezjmrpdqgiicfprkgadi</code>	Generated Date: July 24, 2026

1. Executive Overview

PhishGuard is an enterprise-ready, multi-tenant cybersecurity awareness platform designed to transform workforce employees into an active security defense layer. Engineered with modern SaaS aesthetics (inspired by Linear, Vercel, and Clerk), the platform features **floating rounded glassmorphic navigation bars**, **AI-driven phishing campaign generators**, **automated behavioral risk scoring**, **interactive micro-learning**, and **multi-portal role-based access control (RBAC)**.

2. Portal Architecture & Navigation Flow

- **Landing Page (/):** Public entry featuring platform highlights, enterprise capabilities, and floating glass navigation.
- **Portal Selection Gateway (/portal):** Enterprise portal selection hub routing users cleanly between Employee and Organization Auth.
- **Employee Portal (/auth/employee & /dashboard):** Searchable organization selection, employee registration, interactive micro-learning lessons, quizzes, certificates, and personal risk scores.
- **Organization Admin Portal (/auth/organization & /admin/dashboard):** Full enterprise manager dashboard, campaign builder, department heatmaps, AI generators, and audit reporting.

3. Implemented Feature Matrix

Module Feature	Technical Description & Capabilities	Status
Multi-Portal Authentication	Separated Employee & Organization portals with searchable verified org dropdown, JWT bearer token persistence, and quick demo logins.	Completed
Glassmorphism UX/UI	Floating rounded navbars (<code>`backdrop-blur-2xl`</code> , <code>`bg-slate-900/40`</code> , <code>`ring-1 ring-white/10`</code>), sticky viewport scrolling, dark theme aesthetic.	Completed
AI Phishing Campaign Engine	AI-generated phishing email templates, industry targeting, difficulty levels, tracking token links (<code>`/simulated-landing/:token`</code>), and event logs.	Completed
Behavioral Risk Metrics	Automated DB triggers computing click rate, open rate, report rate, time-to-click, department threat heatmaps, and AI predictive risk models.	Completed
Security Learning Center	Micro-training lessons, interactive quizzes with score validation, auto-generated PDF certificates, and employee badges.	Completed
PhishGuard AI Copilot	Embedded floating interactive AI security chatbot assistant accessible across employee and admin layouts.	Completed
Supabase & PostgreSQL DB	21 relational tables, automated SQL triggers & functions for metrics, RLS policies, connection pooling, and <code>`supabase_setup.py`</code> tool.	Completed
Vercel & Analytics Deploy	Configured <code>`vercel.json`</code> SPA rewrites (fixes 404 on refresh), integrated <code>`@vercel/analytics`</code> and <code>`@vercel/speed-insights`</code> .	Completed

4. Quick Test Credentials & Live Access

The platform includes 1-click test credentials embedded directly on the auth pages for immediate verification:

Role / Portal	Direct Portal URL	Email	Password
Employee Portal	/auth/employee	alice.smith@acme.com	employeepassword123
Employee Portal	/auth/employee	tony.stark@stark.com	employeepassword123
Organization Admin	/auth/organization	admin@demo.com	adminpassword123
Organization Admin	/auth/organization	admin@acme.com	adminpassword123
